GUI Report																L
Update testing report with updated testing methods and justify changes						14										L
Update methods and future assessment plans							-					\perp				L
Update Risk Assessment and Mitigation report and justify changes																L
Implementation and Report																L
Analyse code used in new project and determine changes to be made																
Update code to meet new requirements																
Explain how code meets updated requirements								L,								
Report on changes made to software and justify these																Ĺ
Update Website								L							T	Ţ
															T	ſ
Assessment 4																
Implementation																
Ensure the game and requirements so far meet the remit															, T	
Determine what needs to be added to the game for all requirements to be met															,	
Determine what changes need to be made based on updated architecture										□					1	Ī
Determine class structure and design for new additions											\Box				1	Ī
Write code whilst testing to implement new features												1 →				Г
Write comments highlighting updated/new sections of code																Ţ
Upload executable on website															, 7	_
Ensure code can be inserted in the zipfile															, T	Г
Final Architecture and Traceability report									<u> → </u>						, 	t
Review current requirements against current architecture															, 	t
Propose Changes															,	t
Finalise changes															,	T
Restructure UML											L,				,	t
Evaluation and Testing Report																t
Analyse the brief and make bullet points of key points															-	T
Reanalyse requirements												1			-	t
Check that the game meets each point in the brief and all the requirements											<u>_</u>				, 	t
Prepare a list of core tests that are done each time a significant change is implemented															, 	t
Systematically test code throughout implementation																t
Create logs of test results												$\overline{}$, 	,
Create a graph of test results over time												1			,	_
Project Review Report												+ + +				T
Analyse current team management methods	† † †	+ + +	1 1									+				f
Review management methods against initial management methods	1	 	1 1									+			, 	t
Analyse how changes in requirements and risks affected team management	† † †	+ + +	1									+ +	- 1	\rightarrow	, 	t
Review changes in tools used and report on why		+ + +										+ +				r
Review changes in tools used and report on why	+ + +	+ + +										+	+		1 🕞	þ
Write a short report on changes in our understanding of software engineering	+ + +	+ + +										+	+		 	f
Update Website						+ +						+	+		<u> </u>	f
Opure Website	+ + +	+ + + -	+ + +	+		+ +	-		-+			+			$= \mp$	F
